

MUST 4IR BUSINESS SOLUTION GARAGE

The Malawi University of Science and Technology (MUST) was established by an Act of Parliament No. 31 of 2012. In its roadmap, the university advances the Philosophy of promoting a culture of “*Doing Business in an Unusual Manner*” and has strategically created the **MUST Institute of Industrial Research and Innovation (MIIRI)** to address business strategic needs using both business tenets and technology.

The MIIRI in partnership with the Department of Computer Science and Information Technology (CSIT) has now created the “MUST 4th Industrial Revolution Business Solution Garage”, in short, “MUST 4IR Business Solution Garage” is aimed at interfacing and working with the private sector industries and government to provide solutions related to the 4th Industrial Revolution.

The work of the MUST 4IR Business Solution Garage will be guided by an understanding of innovation in a public and private sector context as ‘the creation and implementation of new and service delivery solutions (systems, processes, methods, models, products and services) resulting in significant improvements in outcomes, efficiency, effectiveness and quality’.

The MUST 4IR Business Solution Garage will facilitate conception, development and implementation of innovative ideas within and throughout the public and private sector services. This will be achieved by facilitating pilot projects aimed at demonstrating the value of innovative solutions, and through activities that create an enabling environment within the public and private sectors to support and sustain innovation.

We now call for organisations to partner with us in finding solutions to problems affecting their businesses to attain strategic outcomes. Please complete the form using the QR Code or via the link (<https://bit.ly/3L3mJHy>), and the partnership roadmap will start as soon as we get your scope of the challenge.
